

Rainbow Scrap Challenge Sampler - Roman Stripe

This one is built off a four patch unit. That means each subunit will measure 3.5 inches.

Cutting:

Start with three 1.5 inch strips. If possible find a light, medium and dark. Each strip needs to be at least 14 inches long. If you don't have scraps that long, you can use two 7 inch strips or even four 3.5 inch strips.

Sewing:

Sew the strips together in order from dark to light and iron toward the dark fabric. Press carefully to avoid distorting the strip set.

Cutting:

Sub-cut into squares that are 3.5 inches each. Use the seam lines to make sure your strip sets are straight. Arrange as shown.

Sew into a four patch. Press the seams away from the pieced subunits.

Your unfinished block should measure 6.5 inches.
