

BULLSEYE

RAINBOW SCRAP CHALLENGE 2015 SAWTOOTH STAR SAMPLER

FABRIC

Log Cabin blocks are easier to do on an odd grid than on an even grid. It works with a 6 inch square though, if you start with a larger center square. This one is a log cabin variation called Bullseye. All you will need is 1.5 and 1.75 inch strips of indigo and 1.5 inch strips of background along with a 2 inch square of indigo. The indigos can be the same or different.

CUTTING

Here are the pieces you will need:

1 - 2 inch square of indigo

2 - 1.5 by 2 inch strips of background

2 - 1.5 by 4 inch strips of background (notice that it looks shorter in the picture, I figured it out as I sewed the first round)

2 - 1.75 by 4 inch strips of indigo

2 - 1.75 by 6.5 inch strips of indigo

SEWING

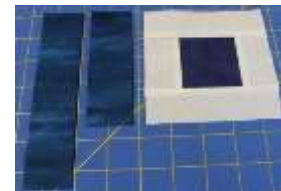

Sew the shorter strips of background onto either side of your center square. Press away from the center square.

Next sew the longer strips of background onto the top and bottom of the pieced unit. Press away from the center.

Next sew a short strip of blue to the pieced edge of the center square. Press away from the center.

Finally sew the long blue square onto the left and right sides. Your block should be 6.5 inches unfinished.

FINISHING

Add your star points and your first sampler block of the month is ready to go.
