

WHIRLER

RAINBOW SCRAP CHALLENGE 2015 SAWTOOTH STAR SAMPLER

FABRIC

This is a simple whirling block based on two inch strips. You will need two shades of orange and some background fabric.

CUTTING

Start by matching one 2 inch orange strip with a background strip and use the easy angle ruler to cut two HST units. Repeat with the other orange. You could also use one orange or four different oranges depending on what scraps you have on hand.

After preparing 4 HST units, you will need to cut 4 squares of background fabric and two rectangles of each orange 2 by 3.5 inches each.

SEWING

Sew the HST units together, remove dog ears and press. Match each HST so that the hypotenuse of the orange touches the square.

Sew the squares together and press away from the HST units.

The two patch should now be the same size as your rectangles. Match them up so that the other hypotenuse of the orange touches the orange rectangle. Sew each of these four pairs of rectangles together.

FINISHING

Now you will have four subunits ready to arrange. Whirl them around the center point and sew the four patch.

Here is your finished 6.5 inch block.

Add star points to complete your sampler block.
