

SWAMP ANGEL STAR

RAINBOW SCRAP CHALLENGE 2015 SAWTOOTH STAR SAMPLER

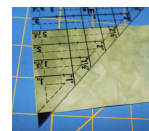

Swamp Angel Star is a pretty block with a very strange name. It is a minor variation of the Ohio Star block, so it should go together pretty quickly. The corners are replaced with HST units, which gives it a nice dimensional look.

FABRIC

- 1.5-inch strips in two shades of green as well as background
- 2.5-inch strips in background and green.

CUTTING

Place the 2.5-inch strips right sides together and use the easy angle ruler to cut 4 HST pairs.

Next, layer up the 1.5-inch strips and cut them with the easy angle ruler. You will need 16 QST units - 4 of background, 4 of brighter green and 8 of the other green.

Finally, cut a 2.5-inch square of green fabric.

SEWING

First, sew the 4 HST units together. Trim dog-ears and press toward the darker fabric

Next, start sewing the QST units, first into pairs and then into squares.

Your 8 finished subunits will be combined with the green square to make a nine patch. Arrange the units as shown

Sew them into a nine patch to make your finished star block.

FINISHING

Insert the block into your star points using [this tutorial](#) and you will be all set. Tada!
